C4 Fab 2010+ 4Runner Engine Bay Accessory Tray Install Guide.

**Note:** You may want to install your electrical accessories onto the tray before installing the tray into the vehicle.

**Tools required:** 10, 12, and 13mm socket and ratchet with extension or 10, 12, and 13mm wrench.

1) Begin by loosening (**do not remove bolt all the way**) the bolt holding this electrical connection mounting bracket to the fender well behind the fuse box area.
2) Slide the accessory tray mounting tab underneath the metal bracket that you loosened in step one.
3) Align the tray with the two threaded holes in the upper portion of the fender well. Loosely install the two provided bolts.
4) Adjust the tray so that it sits flat and level. Tighten down all hardware.
